

HARYANA 2047

Agenda - Two Hour Introductory Presentation

Strategic Foresight Approach for Haryana in formulating its 2047 VISION

Foresight support consists of a systemic examination of potential risks, opportunities and development that could affect the State Government's strategic direction. Forming an internal 'early warning system', this approach equally facilitates consensus-building among stakeholders on the prioritization of responses to potential high-impact events and informs agreement on necessary trade-offs in future policy and planning initiatives.

Monday, July 24th
