

SDG's Alignment Analysis Series

NGO's alignment with SDGs in Haryana

Significance of NGOs in SDG implementation: Synergies and Linkages

The non-profits have a crucial role to play in the SDGCC framework wherein, they can be an active connection for citizen-oriented data, problem identification and resource mobilisation. The non-governmental organisations (NGOs) can ensure the accountability of governments and businesses towards SDGs. Not only do they create an enabling environment for the contribution to SDGs and its documentation but assist in also communicating the SDG progress and raising awareness amongst the citizens.

Thus, identifying the NGOs working in alignment with SDGs and catalysing their efforts by bridging the knowledge and action gap is strategic towards ensuring an accelerated track for SDG achievement. The study provides a snapshot of the non-profit landscape of Haryana, highlighting 152 organisations which are working in close alignment with the SDGs.

Key Findings

Number of Non-profits: 152

Number of Projects implemented: 379

Number of Non-profits headquartered in Haryana: 73

Amount funded for the Projects: INR 91.02 Cr. (49 projects)

Amount funded for the projects specifically in Haryana: INR 38.28 Cr. (26 projects)

Report Highlights

Composition of Board Members

Organisation preferred to have board members with domain expertise. Based on our findings, 100 organisations out of 152 are being led by the members with domain expertise.

Target Group

Children are the most preferred beneficiaries targeted by the Organisation with 173 projects followed by Youth and Women with 134 and 75 projects respectively.

Focused Thematic Areas by Projects

Education & Skills leads the race with 161 projects followed by Poverty alleviation, healthcare & WASH and Women Empowerment & Gender Equality with 94 and 31 projects respectively.

Focused SDGs by Projects

Quality Education is the most preferred SDG with 147 projects aligned, followed by Good Health & Well-being and Gender Equality with 94 and 31 Projects

Location of Projects:

The highest number of projects has been implemented in Gurugram with 142 projects, followed by Faridabad and Nuh with 48 and 32 projects respectively

Government Collaborations

Only 5% of the Projects are implemented in collaboration with the Government entities.

Way Forward

Performer in the SDG (3, 4, 8) and scores the lowest in SDG (1, 5). SDGs (1,3,4,5,8) emerge as the key SDG focus of our study as well, establishing strong linkages with the state's SDG performance

Despite improvements in scores, SDGs (7, 9, 11), it remains an aspirant in these SDGs as compared to other states. These SDGs could be targeted to fast track the achievement, given the rapid progression

Spatial skewness observed across NGOs in alignment & demands a balanced approach where the work can be expanded to other regions, specifically the aspirational district of Nuh

NGOs thrust towards SDGs (1,3,4,5, 8) ties well with Haryana's performance in SDG

Fast tracking progress in SDGs (7,9,11)

Need-appropriate distribution of resources

Performance remains unchanged for SDGs (6, 10, 15, 16) across the two years and neither are they addressed through the work of NGOs, highlighting a knowledge and action gap which needs to be bridged

Bridging the knowledge and action gap for SDGs (6, 10, 15, 16)

Higher convergence with Government Agencies

Only 5% of projects which are being implemented in convergence with Government Agencies Targeting a higher percentage of convergence will help in maintaining the NGOs alignment with SDGs

Identifying the SDG champions and sharing of their practices could enhance the SDGs alignment of NGOs through peer-learning. This study provides examples that aim to inspire action, to make the case for the concrete impacts achieved by applying the SDGs, and to encourage mutual learning.
